

National Military Contacts for State Assessment Work

Military installations are required to have an integrated natural resource plan. If you are aware of a local forested military installation (or want to check if there are any forested military installations you should be aware of), but are not sure who to contact, you can start with the national contacts listed below. These military contacts are foresters and can direct you to the appropriate resource manager for a specific local military installation. They are a great starting point to help you find the local installations and contacts.

US Army Installations Nationwide Contact Person:

Scott English, US Army Environmental Command

(410) 436-7377

Scott.English@us.army.mil

US Navy Installations Nationwide Contact Person:

Craig Woods, Naval Facilities Engineering Command

(202) 685-9330

craig.woods@navy.mil

US Air Force Installations Nationwide Contact Person:

Clay Ware, US Forest Service Liaison to the Air Force

Stationed at the Air Force Center for Engineering and the Environment

(210) 536-1391

clayware@fs.fed.us
